

I claim:

- 5        1. A fast pedestal mechanism for shower panel, fully utilizing original component pre-built on the wall to conveniently mount it, wherein said fast pedestal is comprised of a carrier and a retainer ring, therein said fast pedestal is tabular structure, which has a socket formed on the middle of upper portion for connecting to the original component in socket joint, and fastened on it from outside by securing said retainer ring, and there is a connecting device cooperating to the shower panel built upon said carrier.
- 10        2. A fast pedestal mechanism for shower panel as claimed in claim 1, wherein said component pre-built on the wall is an extended outlet pipe tip with a male thread on the outside for connecting with the female thread of said socket of the carrier.
- 15        3. A fast pedestal mechanism for shower panel as claimed in claim 1, wherein said connecting device is a hookup set upon the top end of said carrier for hanging shower panel.
- 20        4. A fast pedestal mechanism for shower panel as claimed in claim 1, wherein said connecting device is a clevis set upon the top end of said carrier for hanging shower panel.
- 25        5. A fast pedestal mechanism for shower panel as claimed in claim 1, wherein said carrier is attached with a suction cup at the bottom portion for absorbing on wall and fastening the bottom end.
6. A fast pedestal mechanism for shower panel as claimed in claim 1, wherein said shower panel is secured on said carrier at the middle portion.

7. A fast pedestal mechanism for shower panel as claimed in claim 1, wherein said retainer ring is a nut.
